DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1 and 2, drawn to Method Of Estimating The Total Amount Bet By An Individual Patron, classified in class 463, subclass 25.
 - II. Claims 20-32, drawn to Method Of Estimating The Performance Of A Croupier At A Roulette Table, classified in class 463, subclass 1.
 - III. Claims 33 and 34, drawn to Method Of Determining Whether A Croupier Is Practicing Sector Spinning, classified in class 273, subclass 274.
 - IV. Claims 35-36, drawn to Roulette Gaming System, classified in class 463, subclass 17.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I, II, III and IV are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of estimating the total amount bet by an individual patron, and the method of estimating the performance of a croupier at a roulette table may be determined by incorporating microchips or transmitters in each of the chips, and to incorporate antennas under each of the betting areas of a

roulette table, under each player station, under the chip rack and under chipper machine in order to accurately locate each chip as each chip is moved.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Georg Seka on 8/24/00 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Benjamin H. Layno whose telephone number is (703) 308-1815.

For **official** fax communications to be officially entered in the application the fax number is (703) 305-3579.

For **informal** fax communications the fax number is (703) 308-7768.

Any inquiry of a general nature or relating to the **status of this application** or proceeding should be directed to the receptionist whose telephone number is (703) 308-1148.

Any inquiry concerning the **drawings** should be directed to the Drafting Division whose telephone number is (703) 305-8335.
